**BELIEFS.****CONDUCT.****COSMOLOGY:**

(For full details, please see the General Index pages of each book)

The fundamental Question of Laws controlling the Cosmos: Their nature and source.

**ETHICS. FOSSIL AND THE LIVING RECORDS:**

Intone the near total absence of monstrosities and teratogeny, and hence the *purposeful* operation of Law.

**GRAVITATION:**

The fundamental universality of it and the full consequences of the latter have been ignored. The structure of the Cosmos they reveal when carefully examined. The incontrovertible analysis of Newton's Law.

**LAW:**

Inescapably implies its own lawgiver.

**LIGHT AND THE STRUCTURE OF THE UNIVERSE. LOGIC:**

Demands that we ignore *nothing* relating to the structure of the World.

**MORALITY.****NEWTON'S LAW:**

Its dimensional analysis.

**PHILOSOPHY.****PHYSICS:**

Developments suppressed since 1985. Subject to the Law controlling the structure of the Universe.

**QUANTUM MECHANICS:**

*Must* be reformed based on the geometrical, *not* the probabilistic structure of the atom.

**REASON.****RELATIVITY:**

It *cannot* stand in the dimensional analysis of Newton's Law.

**RELIGION AND SCIENCE:**

*Seeming* to be at loggerheads on account of the *faulty* application of Logic on *both*.

**THEORIES.****TRUTH.****UNDERSTANDING OF ALL PAST HISTORY AND OF THE PURPOSE AHEAD:**

*Must* be revised.

**UNIVERSE OPERATING UNDER LAW:**

Points to the Lawgiver: (a) having established the operation of the faultless Logic of Logos-God,

(b) *no longer* introduced arbitrarily,

(c) shown to be there by the Laws of the *functioning* Universe.

## ACKNOWLEDGEMENTS

This collection of books would never have been written had their author forgotten the most valuable lesson he was ever taught: That an engineer may *never* forget to test the correctness of his equations by subjecting them *also* to *careful* dimensional analysis. It was a lesson taught by Professor Demosthenes Pippas, Vice-Rector for the academic year 1953-4 of the ΕΘΝΙΚΟΝ ΜΕΤΣΟΒΙΟΝ ΠΟΛΥΤΕΧΝΕΙΟΝ (the National Technological University of Athens) in the context of his welcoming address to the freshmen of that academic year. It was a lesson that, apparently, students of other, mostly theoretical, disciplines were never taught and they never applied to their equations ever since Isaac Newton presented the law of Universal Gravitation. Had that Law been subjected to dimensional analysis sooner, that much sooner would the World science have taken the *correct* road to its ultimate destination. When, after twelve years of patient silent work, the findings of that analysis were presented to the world intellectual and scientific community in 1985, the latter was so shocked for its having failed for three whole centuries to take note of the treasure right under their all-sniffing sensitive noses, that it has ever since diligently suppressed the findings under cover of arbitrary, thoroughly unconscionable for academics excuses, pseudo-academic prerogatives of all sorts and sheer silence. Where we as a world are now at is no less due to *that their long-standing determined misbehavior*; which this collection of books, presented gratis to the world in view of the gravity of the findings contained in them, could not but also contain:

Because, far more than *any* lesser law, a universal Law *inexorably* introduces its own correspondingly far greater Lawgiver; also of a physical universal, or absent that, *inexorably of a no-physical extra-universal Nature!* And as *no* Lawgiver of the former nature is found, *terminally inexorably*, under the full weight of the Universe and of the Logic that controls it to no end, the Lawgiver *cannot* be of any other than a Nature of the *latter* kind! Unless the succinct word "GOD" (that *without any taint of profanity* can indeed stand for "Governing Operations' Designer", cf. "For truly, do I tell you, till heaven and earth be gone, not one iota or one dot shall be excised from the Law until *all that must* be done *be* truly done", Matt. 5,18) be first of all understood in these *more than rock-solid, more than diamond-hard terms, it cannot correctly be understood at all!* In simple language: *Utter fools indeed are all* those who think they can argue that "the existence of God cannot be proven"! More than all others, such indeed are the people who having since 1985 been presented with precisely such physical evidence and Logical arguments have stubbornly kept totally silent and unresponsive. For the completeness of the witness, some of them could not but be here exposed!

Anyone who has had serious dealings with the world professorial caste knows how diligently they attempt to protect themselves and each other by commonly attempting to defend their agreed upon theories and beliefs by never putting down in writing any word that may later come back to haunt them. The true progress of science and knowledge that concerns all humanity that ultimately foots the entire bill is not their sole concern, but only what can strengthen the manner and means by which they as individuals and *in toto* build their own reputations. This has not left unaffected even this presentation to the world public: Offered to the National Library of Greece [solely in order to honor and after so many long centuries continue Greece's ancient contribution (still alive under the ashes) to civilization, science, knowledge and the general understanding of the true duty of Ἄνθρωπος in this world, that this country abandoned since the so-called "Christian Middle Ages" and only thus ended up to its present state], by requesting that they accept this collection of books to be presented to the world through their server, the Library refused the offer (never by their own admission made to them before), *unless I were willing to abandon and surrender to them my author's rights* so that they may use them as they will; perhaps fearful of offending the established *disorder* of things over the entire world if they did not obtain my consent! As, naturally, no author honoring his own spine would agree to such a demand, I, feeling heavy upon me the obligation to defend to the end the ideas that I express in these books, chose to offer these books directly for free to the users of the Internet for their personal edification, by forbidding to the extent possible to me the for-profit commercialization of these books, as stipulated in the copyright page of each one of them. In light of this development, I only request those who shall agree with these ideas, too, spread them *intact* through their own servers, so that the furious effort of those determined to see them permanently lost may never succeed.

The author further acknowledges the valuable for him news on developments in the USA on the Science vs. Religion front during the years since 1991, fed regularly to him by his good friend Professor Dr. George Bistis of Drew University, NJ.

Lastly acknowledged is the truly invaluable assistance of: (a) Mr. Sp. Stoupakis, a Macintosh computers aficionado and guru who managed to convert the author's mostly MacWrite II files written over the years 1991-9 on a Macintosh IIsi-system 6.0.7 to the modern pdf form, and (b) MESSRS. Eur. Gerardis and P. J. Stavropoulos who set up this entire project as it developed on the Internet so that it become available to all everywhere.
